FOR IMMEDIATE RELEASE

WASTEWATER TREATMENT PLANT UPGRADE PROJECT UPDATE

The City's Wastewater Treatment Plant Upgrade Project is entering the seventh week of construction. The contractor is ahead of schedule, with most of the excavation complete. At this time, there are concrete trucks entering and exiting the project site frequently. Construction takes place during weekdays and is suspended over the weekend. Trail users should exercise caution when on the portion of the trail that passes in front of the Wastewater Treatment Plant and watch for vehicles. The old runway (Jere Melo Street) is the only access point for construction traffic and is limited to City staff and contractors. This weekend's Coastal Trail Celebration will use the runway as the main entrance to the event.

Questions regarding this information should be directed to Jason Island, Construction Inspector, at (707) 489-8105.
